

# GOVERNMENT SERVICES

## ATLAS GOVERNMENT SERVICES

Atlas partners with General Contractors and more than a hundred Manufacturers and Distributors to qualify, engage, and win government contracts. We support new construction, remodeling, and various other government build and construction requirements.

We sell plumbing and industrial supplies direct to the Department of Defense (DoD) and U.S. Federal Agencies. We also partner with General Contractors, manufacturers, and distributors to successfully prospect, bid, and win federal opportunities.

A family owned business for more than 75 years, our long standing relationships with manufacturers allows Atlas to be highly competitive on cost. This enables Atlas to provide value to General Contractors and make them more competitive.

### COMPANY DATA
